EARLY INTERVENTION

WHAT IS THE EI PROGRAM?

The Early Intervention (EI) Program provides services to help your child grow and learn during the first 3 years of life. It serves families of children from birth to age 3 who have developmental delays or disabilities or who are at risk for developmental delays.

WHY IS EI IMPORTANT?

During the first 3 years of life, children's brains and bodies are growing rapidly. They are learning many new things about the world around them. While all children need love and support to grow and learn, some children need a little extra help. With the right help, your child can reach his/her potential.

HOW DO I LEARN MORE?
